

BEST PRACTICES OF INSTITUTION

The institute promotes the environmental as well as moral, social consciousness among students thereby introducing new best practices in successive years which makes value addition to existing practices of the college.

In 2018-19 we stated two best practices in terms of

A) Saving trends B) Environmental conservation.

A) Saving trends- under this practices we promote students to save expenses thereby reduced use of vehicles which leads towards saving habits among students which ultimately help them to project expenses and budget the other economic conditions for themselves.

B) Environmental conservation- under this practices we promote students to travel through bicycle one day in every week which ultimately leads environmental conservation habits among students which help them to understand alternative facilities and source for getting job done without harming environment.

For above mentioned best practices we promote student by conducting workshops, seminars, lecture sessions so as to keep them in touch of practices as well to make them habituated to theme of practices and also to make them conscious about the way or methods of implementation of the practices.

From preceding sessions we have other best practices such as Kitaab-kutiya, Book donations practices, Tobacco free campus as well as pollution and noise free campus which ultimately shows institutions consciousness towards overall involvement and growth and development of students as well as to show up the confirmity of practices from preceding session to till date with applied norms and conditions.

Best Practices in the institute

Session 2018-19

- Students were encouraged to come by bicycle once a week to control pollution and control unnecessary expenditure on fuel.
- Successful initiation and working of Mentor-mentee Scheme between Teachers-Students-Alumni
- Financial help provided to needy students by the teachers.
